Grelinette

The grelinette is still relatively unknown in the Netherlands, while the French have been using it for centuries. Where we used to use the shovel or spade as standard to prepare the garden for a new season, we now opt for the grelinette much more often. With the grelinette you aerate the soil without disturbing it as with a shovel or spade. The grelinette, also called digging fork, are at the front when you start your vegetable garden according to the rules of permaculture gardening. The grelinette is equipped with forged teeth, completely galvanized so that it will last a very long time> deWit makes the grelinette from steel so that you do not have to worry about broken wooden handles, something that usually happens at times when it is not convenient for you.

Specificaties

Item nr	Omschrijving	Gewicht	Formaat	Handgreep
020510	Bandhamer met langesteel en nylon koppen	1,90	300x190x190
